

Seven easy steps to work out the best way to hang your box-shape model with 6 or 8 hanging points.

Instructions for models:

The Mawar, The Kasih, The Akash, The Wahyu, The Kasna, The Sanggah & The Jaya

 **bambulah**
enchanted mosquito nets

Step 1

Work out your 4 corner points

Step 2

If possible, put each corner point at least 50cm outside of each corner of the bed

Step 3

Mark the points on the ceiling for the 4 corners and drill your holes, put in the wall plugs & hooks

Step 4

Loosely connect your bed canopy with 4 ropes and position it over your bed in such a way that you are happy

Step 5

Once you're happy, tighten each of the 4 ropes, so that these first 4 ropes to each corner are done

Step 6

Now mark & drill the support holes in the middle of the 2 corner points on the length side (for the nets with 6 hanging point) and in the middle of each side for the nets with 8 hanging points

Step 7

Connect the remaining 2 or 4 ropes and your net is ready to be used

Tip: when at step 4, never pull your mosquito net with hard force, always do things gently when hanging a bed canopy
